DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 79-118, drawn to a method, apparatus and a computer readable medium for building predictive models from transaction data, classified in class 706, subclass 25.
 - II. Claims 119-155, drawn to a data processing method, financial system and a program storage device for reporting the relative contribution of element of values of a business, classified in class 705, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case the different inventions are unrelated because as can be seen above each of the invention intends to accomplish a different result using different means, steps or functions.

Invention I, claims 79-118 does not require a function of determining a relative contribution of each of two or more elements of value to a value of a business by analyzing at least a portion of transactions data and reporting the relative contribution of each element of value and the value of the business as required in Group II.

Invention II, claims 119-155 does not require functions for training a neural network model using inputs until an error function associated with an output value is minimized and using one or more weights from the trained neural network models to identify a set of raw and

transformed transaction data by element and output that will be used as an input to one or more predictive models as required in Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and have also acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
